What is the answer:

⑥ Duck or Bunny?

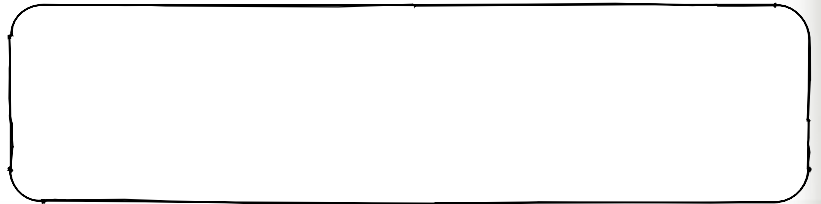

DUCK or BUNNY

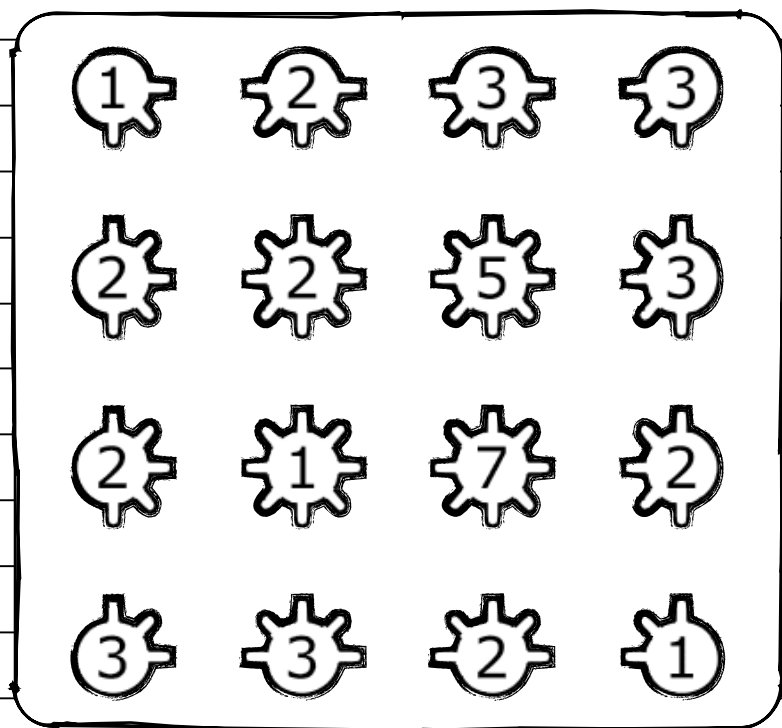

⑦

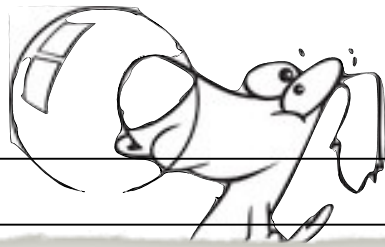

A man who lives on the tenth floor takes the elevator down to the first floor every morning and goes to work. In the evening, when he comes back; on a rainy day, or if there are other people in the elevator, he goes to his floor directly. Otherwise, he goes to the seventh floor and walks up three flights of stairs to his apartment.

Can you explain why?

⑧ Can you find all of the spokes? A digit on a hub denotes the number of spokes that meet there. Spokes never cross and in the end everything will be connected.

9

Due to rumors that there was a world shortage of chewing gum, everyone was stocking up on packs. By the time I'd got to the store, they had sold out!

However, there were two people at the till who had already bought 4 and 5 packs respectively and they kindly offered to share their packs with me.

After the sharing, we all had the same number of packs each and I paid them \$9 for my packs.

How did they share the \$9 between them?

	4				6	5		
	3		9			7		4
7				4	8			1
6	9		1			8		2
		2	6		7	1		
1		3			4		5	6
4			7	1				5
9		6			3		8	
		7	8				1	

# Brain teasers

① Would you rather a crocodile attack you or an alligator?

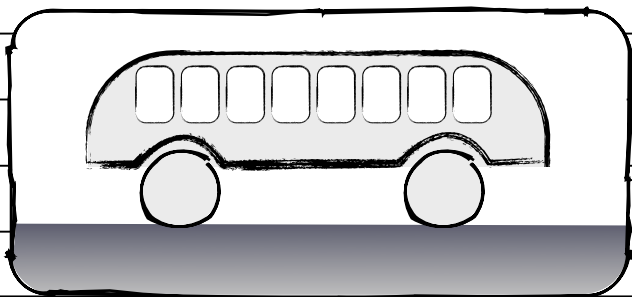

I would rather the crocodile attack the alligator.

② What five lettered words when typed in uppercase, reads the same upside down?

**SWIMS**

③ Which way is the bus traveling?

**LEFT**

The door to the bus is not in view, therefore the bus is traveling to the left.

④ They are three errors in this puzzle - what are they?

they = there

errors = errors

three = wrong, there are 2

⑤ Add the following numbers in your head, then write the sum.

What is the answer: 4100

⑥ Duck or Bunny?

DUCK or BUNNY

BOTH!

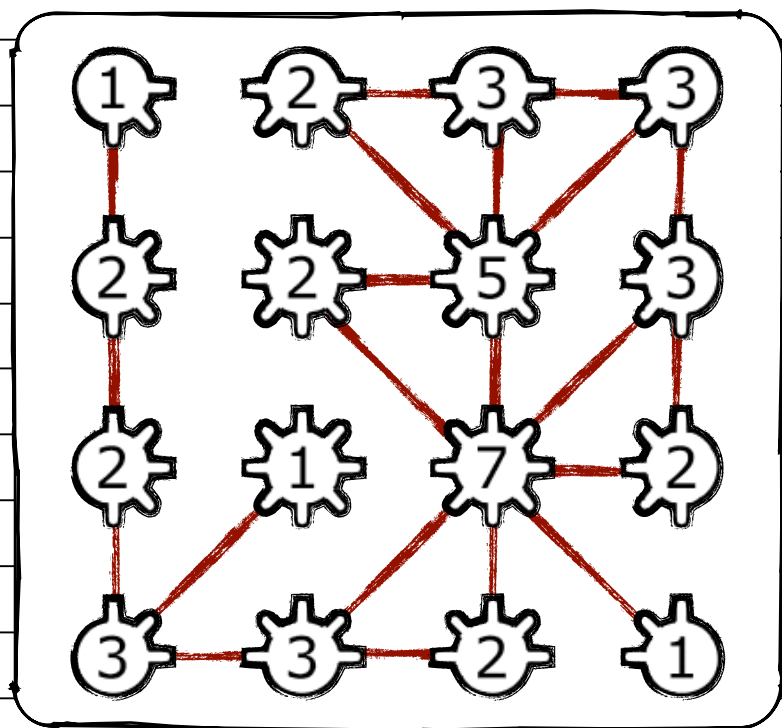

⑦

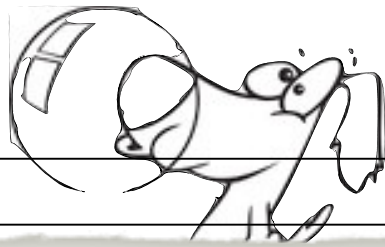

A man who lives on the tenth floor takes the elevator down to the first floor every morning and goes to work. In the evening, when he comes back; on a rainy day, or if there are other people in the elevator, he goes to his floor directly. Otherwise, he goes to the seventh floor and walks up three flights of stairs to his apartment.

Can you explain why?

The man is of short stature. He can't reach the upper elevator buttons, but he can ask people to push them for him. He can also push them with his umbrella.

⑧ Can you find all of the spokes? A digit on a hub denotes the number of spokes that meet there. Spokes never cross and in the end everything will be connected.

Due to rumors that there was a world shortage of chewing gum, everyone was stocking up on packs. By the time I'd got to the store, they had sold out!

However, there were two people at the till who had already bought 4 and 5 packs respectively and they kindly offered to share their packs with me.

After the sharing, we all had the same number of packs each and I paid them \$9 for my packs.

How did they share the \$9 between them?

\$3 and \$6. As there were 9 packs in total, we each received 3 packs. The first person therefore gave me 1 pack, and the second person gave me 2 packs. So the money had to be shared in the same ratio, 1:2.
