

Their Mission

Our mission is to provide children around the world with an absolutely free educational resource. A way to learn, while also having fun. We believe that the best resource should not be reserved for those who can afford them, but should be made available to everyone, everywhere, without a cost/ Using the power of the Internet, this goal is possible.

They believe that educating our population in the single greatest way to achieve the other lofty goals mankind, and that every resource at their disposal ought to be used to this end. They believe that the great worldwide problems and calamities can all be solved through the power of education.

“Thus their mission is to reach every child, in every corner of the globe, and provide them with free educational resources.”

Targeted Audience

This website is great for all ages especially elementary students. There is a variety of topics that cover several age groups. For example, the human body can do body parts for younger kids or muscles for high school biology. This student mainly is targeted at students and young adults. There is no guidelines, worksheets, or lesson plans for adults directly listed on this website.

Personal Reflection

This website is amazing in my opinion. I believe this is a great way to keep my future students engaged in what they are learning. There is nothing better than hands on learning. The games help the students think quickly which I think is a great asset to have. I also love the idea of having educational music to listen to while you are studying content. I think this website is really concerned about educating the public rather than making money.

This website is totally free which makes it accessible to everyone that can get on the Internet. I will use this website when my students finish early so they can keep themselves busy without bothering the other students. This is also a great website to use on a SmartBoard so the whole can participate together. For example, they can all take a chance at the board to label a body.

“The Totally Free Children’s Learning Network”

By: Brittany Frantz

Do you like listening to music while you learn?

The free educational songs are both entertaining and informative. Research shows that children learn better through music than through almost any other medium. Use these educational MP3s to support and enhance your lesson plans.

You can pick topics from :

astronomy, biology, chemistry, concepts, foreign language, geography, geology, history, language arts, life skills, math, and even physics.

You can even add your own songs to their database. Share your talents with millions of children worldwide.

Free educational movies

There is 33 movies that are listed in alphabetic order. They range from absolute value to verb usage. They load right on the page so there is no need to download them to your desktop, but if desired you can right click then press save target as. New Movies are added each month!

Games

What is a funnier way to learn than playing a game pertaining to your topic? This amazing website has games that incorporates astronomy, biology, dinosaur, geography, history, math, memory, and even spelling. Each topic has several games so you can never get bored. This is a great way to keep your students active in their down time.

Overview

This website gives you an option on what you would like to learn about. Half way through the home page there is a list of topics you are able to click on to expand the information. Underneath the hyperlink it will give a quick summary of each topic. You can choose from the animal database, astronomy website, human biology, math, biology, dinosaurs, geography, spelling, geology, and history. Once you click on a topic there is subtopics that break down what you are learning about specifically. You can surf through these by clicking on one specific chapter on the left hand side of the website. This is a great website to use if students need something to do if they finish early or need a visual way of learning. This is a great source of educational entertainment that keeps your students engaged.

"Learning was meant to be both fun, and free. Not boring, and definitely not expensive."
